ALLOTMENT STRATEGY ACTION PLAN 2014-2020

Recommendation	Action	Target Date
On fields where a waiting list exists, limit the number of plots let to any one plot holder. It is recommended that this is reduced from 4 ten Rod plots (40 rods) to 2 ten Rod plots (20 rods). This would not be applied retrospectively.	Investigate amending the current Allotment Garden rules to include a restriction to this effect and secure cooperation from field secretaries.	2014/15
All new plot holders on fields where a waiting list exists, be limited to half a plot (5 rods) initially and progressing to a full sized plot (10 rods) if they can demonstrate they can maintain their plot.	Investigate amending the current Allotment rules to include a restriction to this effect.	2014/15
Deliver further partnership working with the Police (Plot Watch).	Meet with the Police and allotment holders to review the existing Plot Watch scheme.	2014/15
Ensure new allotment provision is considered as part of new development.	Work with Planning Officers to ensure appropriate provision is delivered through the planning process.	On going
Review Quantity, Quality and Accessibility standards.	Review standards as part of the process of reviewing the Local Plan Core Strategy.	2014
	Inspect all allotment site fences and investigate the potential for natural hedging where possible. Working with field secretaries, assess all sites and provide possible solutions to improved security to restrict unauthorised access as funding allows.	On going
	Work with field secretaries to identify sites requiring a steel container and investigate funding for those requiring a container.	2015/16
	Clarify the status of all overgrown plots and work with field secretaries on a rolling programme of clearing overgrown plots e.g. Norwich Road.	2015/16
