Task:	**Work Activity:** Fore Street – Lane Swimming	**Date of Assessment:** 24/04/21	**Author:** Thomas Fell – updated by Stephen Wardle	**Date of Review:** 30/10/2021

Risk Assessment Purpose:	This risk assessment covers the activity of lane swimming at Fore Street pool specifically inline with the COVID-19 restrictions in place as of 22/07/2020. This must be viewed alongside 'FS Final RA Covid' which assesses the use of the Fore Street Pool facility and IBC Activity RA ABA1 General Pool Safety 1920 which assess general pool safety.

Risk Location & the hazard (Exposure to Covid-19 virus or risk arising from building use or change in working practice at a specific location)	**Who might be at Risk?** Staff, Visitor, Cllr., Contractor, Customer	**Control Measures in Place act to remove the activity or situation, or if this isn't possible, control the risk** Things you are already doing to reduce the risk (see checklist for guidance)	**What Further Action is Necessary?** Any additional control measures or equipment that you need	**Action by Who?** Who is responsible for the further action?	**Action by When?** When the action will be done by
Lane Swimming – Social Distancing	Customers / Staff	Access to poolside and changing • All swim sessions booked and paid prior to arrival, removing queue for payment, cash handling and minimising physical interaction. • One-way system in place, allowing access to cubicles, showers and pool whilst maintaining social distance. • All customers to arrive ready for activity. 'Beach Style turn up and swim' • Showers only available for post swim. Lane Swimming • Pool layout changed to 3 wider lanes • 6 swimmers per lane = Bather load of 18. (Within Swim England 6m^2 guidelines with additional safety buffer) • See FST Lane Swimming Layout Plan for detail.			
Lane Swimming – Disinfection / Cleaning	Customers / Staff	Pool water treatment / preparation • Inline with PWTAG Technical Note 45 pool water dosing set to: Free Chlorine min 1.5mg/l | pH 7.0			

		• Pool preparation process undertaken inline with PWTAG Technical Note 45. Poolsides • After each session, poolside disinfected with Chlorine treated pool water and squeegeed down ready for the next session. Cubicles / Changing Areas/ Showers / Toilets • Cleaning slot added to program in between all sessions to allow for cleaning and disinfection of all cubicles, showers, toilets as per FS Final RA Covid' with procedure for completion. • Blocks of 18 cubicles at a time to be used, making it easier and more efficient to clean • See FS Final RA Covid, Operational Plan, FST Layout Plan. • Cleaning regimes undertaken following Ipserv procedures and guidance. • All staff to wear face covering and gloves when undertaking cleaning duties.			

Furthermore, this risk assessment doesn't cover staff/tenant induction back into the building, but this is being agreed with HR/TMT
