

Dear Brian

Following our inspection of your Timber treatment process on 24th November 2016 and can confirm that compliance with the permit was satisfactory. However it was noted that some of the conditions in particular those relating to drying were not relevant to your process and it was agreed that we would work with you to ensure that the permit was updated to reflect only conditions relevant to the process.

It was also noted that you had changed you registered address and this will be updated when we amend the permit.

I would thank you for your cooperation with the inspection and it was pleasing to see that the process was being operated efficiently and a manner which was delivering real environmental improvements

Regards

David
