

# wildlife trail

**1 Birdsong board**

See how many of these typical parkland birds you can hear as you walk through the park.

**2 Butterfly board**

Butterflies have delicate and often complex lifecycles; find out which plants the butterflies in our park need to survive.

**3 Woodland board**

Learn about the layers and interactions that make woodlands such diverse places.

**4 Dead wood board**

Bits of dead wood on the floor haven't just been forgotten about ... being too tidy can reduce this important habitat.

**5 Night-time board**

Once the visitors are gone, the park isn't as quiet as you might think. These are a few of the species using the park at night.

**6 Pond Life**

Water is the source of life, see what life lives in the mysterious underwater world in Holywells Park.

**7 Orchard board**

There's much more to a traditionally managed orchard than simply fruit. This board shows the other important benefits they can have.

**8 Meadow**

Long grass and flowers offer shelter and food for many species. This board shows the wacky mix of creatures using our meadow.

**9 Veteran Trees**

Formed over time, veteran trees have lots of places for wildlife to explore. What is living in the nooks and crannies of our veteran trees?

## AURASMA INSTRUCTIONS

Access to AR overlay materials from mobile devices. Either option is possible

1. Download the Aurasma app from the App Store or Google Play store
2. Once downloaded, open the Aurasma app
3. Follow the on screen instructions, you can create an account or choose to skip that step
4. Click the "A" icon bottom centre of the screen
5. Click the magnifying icon to search for "Holywells Park"
6. Click one of the option by "holywellspark"
7. Click "Follow" top right of screen
8. Click the "[ ]" icon
9. Scan an image that has the following icon

## CAR PARKING

is available at Athena Hall car park off Duke Street.

For the latest bus timetables visit: [www.ipswichbuses.co.uk](http://www.ipswichbuses.co.uk) or [www.firstgroup.com](http://www.firstgroup.com) or pick up a timetable from the stable block reception.

# HOLYWELLS PARK ~ WILDLIFE TRAIL

## introduction

**Holywells Park** is 67 acres (28 ha.) in size with a range of habitats from ponds, woodland and meadows. The park is a designated County Wildlife Site and a Regionally Important Geo-diversity site (RIGS) by UKRIGS. The nature trail travels through many of these different habitats and their respective wildlife.

Use the map on this leaflet to help you navigate around the trail. At each station there will be an information board overlooking the habitat, with information about the wildlife that lives there. An interactive phone app will allow you to test yourself on the key concepts regarding the habitat and the wildlife present. See back of leaflet about downloading app.
