

## **INSPECTION AT CEMEX – PORTMANS WALK**

Meet with peter Milner ands Scott

There were no activities taking place on site during my visit , there are a large number of days when the site is closed, this is indicated in the log book. It was not therefore possible to assess dust generation.

The permit was discussed and each condition gone through to ensure compliance, the log book and other records were viewed.

The registered address of the company has changed to Cemex Materials Ltd, Cemex House, Eureux Way, Rugby. CV21 2DT. The address for local correspondence had also changed to Cemex Materials Ltd, Martels Pit, Slough Lane, Ardleigh , Colchester Essex CO7 7RU. The later is Peter Milner contact address. This will require permit to be amended.

The permit was being complied with, the following points arising

- Condition 35, the most recent PPM report will be emailed to me, this occurs twice a year or more often if the plant is busier.
- Condition 49 minimal spares are kept on site but are available at short notice.
- Condition 52 all operatives have briefings and CPD folders and are fully trained.

VA letter of 11/11/10 was discussed and all the points she raised have been addressed.
