

POLLUTION PREVENTION AND CONTROL ACT 1999

LOCAL AUTHORITY POLLUTION PREVENTION AND CONTROL

APPLICATION FOR A PERMIT

Operator Name: EUROMIX CANCRETE LIMITED

Name/Address of Installation:

2 ARKWRIGHT ROAD IND ESTATE

1 PSWICH

Post code: 192 OUB

Contact Name: P. REND

Telephone number: 51473 225775

Fax number: 01473 253705

E-mail: PHIL @ EURDMIX CONCRETE · COM

The New Pollution Prevention and Control Regime

A new system of regulation for dealing with pollution issues, known as Pollution Prevention Control (PPC), came into force in 2000. PPC is introduced by way of the Environmental Protection Act 1990, the current pollution framework under which you are authorised for Local Air Pollution Control.

The basic purpose of the PPC regime is to introduce a more integrated approach to controlling pollution .rom industrial sources. It aims to achieve "a high level of protection of the environment taken as a whole by, in particular, preventing, or where that is not practicable, reducing emission into the air, water and land" (*Regulation 8(2)-(3)*).

The PPC system applies an integrated environmental approach to the regulation of certain industrial activities. This means that emissions to air, water (including discharges to sewer) and land, plus a range of other environmental effects, must be considered together. It also means that permit conditions must be set so as to achieve a high level of protection for the environment as a whole. These conditions are based on the use of the "Best Available Technique" (BAT), which balances the costs to the operator against the benefits to the environment.

The PPC system places industrial and commercial installations into three new parallel regimes:-

A1 Integrated Pollution Prevention and Control enforced by Environment Agency.

A2 Integrated Pollution Prevention and Control (LA-IPPC) enforced by Local Authorities.

B Local Air Pollution Prevention Control (LAPPC) enforced by Local Authorities.

Installations falling within the A1 and A2 regimes will be subject to control of pollution to land, air and water, ogether with noise and vibration, energy, land contamination, emergencies, amongst other thins. Part B processes currently authorised under Part 1 of the Environmental Protection Act 1990, like your authorised process, will transfer to the LAPPC regime and I remain subject to air pollution control only.

New installations falling under the LA-IPPC or LAPPC regimes should contact the Local Authority for an application pack. You will be given advice on how to prepare your application and how the regime will apply.

For existing authorised processes, the changeover from LAP Cot LAPPC will essentially be an administrative one and will not involve payment of new application fees. The transfer will take place over a phased timetable. An extract of Defra guidance setting out the transfer timetable is attached.

Installations transferring from LAPC to LAPPC do not have to take action at this stage. You are considered to have made a deemed application. The Local Authority has 12 months to transfer your LAPC authorisation to an LAPPC permit. If your authorised process is due for transfer, you will be contacted to confirm that a deemed application has been made. If the Local Authority fails to notify you of its determination of the application within 12 months the operator can notify the Local Authority in writing which then triggers a deemed refusal. The operator will then have leave to appeal against this refusal.

For further information, contact Environmental Health and Housing Services on 01284 757042.

Application for a permit

Local Authority Pollution Prevention and Control Pollution Prevention and Control Act, 1999

Pollution Prevention and Control (England and Wales) Regulations 2000 (as amended)

Introduction

When to use this form

This regime is known as Local Authority Pollution Prevention and Control, LAPPC. Installations permitted under this regime are known as B installations. Use this form if you are sending an application for a 'Part B' permit to a Local Authority under the Pollution Prevention and Control (England and Wales) Regulations 2000 (as amended) ("the PPC Regulations").

Before you start to fill in this form

Please read the Defra general guidance manual issued for LA-IPPC and LAPPC. This contains a list of other documents you may need to refer to when you are preparing your application, and explains some of 'he technical terms u sed. You will a lso need to read the relevant sector guidance note, BREF note or Process Guidance note as relevant. The Pollution Prevention and Control (England and Wales) Regulations 2000 can be obtained from The Stationary Office, or viewed on their website at: www.legislation.hmso.gov.uk/si/si2000/20001973.htm

Which parts of the form to fill in

You should fill in as much of this form as possible. The appropriate fee must be enclosed with the application to enable it to be processed further. When complete return to:

Environmental Protection Services Ipswich Borough Council Civic Centre Civic Drive IPSWICH IP1 2EE

Other documents you may need to submit

There are number of other documents you may need to send us with your application. Each time a request or a document is made in the application form you will need to record a document reference number for the document or documents that you are submitting in the space provided on the form for this purpose. Please also mark the document(s) clearly with this reference number and the application reference number, if you have been given one, which will be at the top of the form overleaf. If you do not have either of these, please use the name of the installation.

Using continuation sheets

In the case of the questions on the application form itself, please use a continuation sheet if you need extra space; but please indicate clearly on the form that you have done so by stating a document reference number for that continuation sheet. Please also mark the continuation sheet itself clearly with the information referred to above.

Copies

Please send the original and 3 copies of the form and all other supporting material, to assist consultation.

If you need help and advice

We have made the application form as straightforward as possible, but please get in touch with us at the local authority address given above if you need any advice on how to set out the information we need.

B1 About the Installation

Please fill in the table below with details of all the current activities in operation at the whole installation.

In Column 1a Activities in the stationary technical unit

Please identify all activities listed in Schedule 1 to the PPC Regulations that are, or are proposed, to be carried out in the stationary technical unit of the installation.

In Column 1b Directly associated activities

Please identify any directly associated activities that are, or are proposed, to be carried out on the same site which:

- * have a technical connection with the activities in the stationary technical unit
- * could have an effect on pollution

In **column 2a and b Schedule 1 references**, please quote the Chapter number, Section number, then paragraph and sub-paragraph number as shown in Part 1 of Schedule 1 to the PPC Regulations. For example, *Manufacturing glass where the use of lead or any lead compound is involved*, would be listed as Chapter 3, Section 3.3, Part B(b).

B1.1 Installation table for new permit application

LAPPC Application Form: to be completed by the operator					
For Local Authority use					
Installation Reference:	Officer Reference:	Date received:			

B1.	2	Why	is	the	application	n beina	made?

the installation is new

it is an existing Part B process authorised under the Environmental Protection Act f or which a substantial change is proposed within 4 months of the transitional date and an LAPPC permit is required.

B.1.3 Site Maps

Please provide:-

A suitable map showing the location of the installation clearly defining extent of the installations in red

Doc Reference <u>EEP/IPS/co1</u>

 A suitable plan showing the layout of activities on the site, including bulk storage of materials, waste storage areas and any external emission points to atmosphere

Doc Reference <u>EEP/IPS/010</u>

B2 The Installation

Please provide written information about the aspects of your installation listed below. We need this information to determine whether you will operate the installation in a way in which all the environmental requirements of the PPC Regulations are met.

B2.1 Describe the proposed installation and activities and identify the foreseeable emissions to air from each stage of the process (this will include any foreseeable emissions during start up, shut down and any breakdown/abnormal operation)

The use of process flow diagrams may aid to simplify the operations

Doc Reference: <u>EEP/IPS/003</u>

B2.2 Once all foreseeable emissions have been identified in the proposed installation activities, each emission should be characterised (including odour) and quantified.

atmospheric emissions should be categorised under the following

(i) point source, (e.g. chimney / vent, identified by a number and detailed on a plan)

(ii) fugitive source (e.g. from stockpiles / storage areas).

If any monitoring has been undertaken please provide the details of emission concentrations and quantify in terms of mass emissions. If no monitoring has been undertaken please state this.

(Mass Emission - the quantification of an emission in terms of its physical mass per period of time. Eg. Grams per hour, tonnes per year)

C3.2 Is there any information in the application that you believe should be kept from the public register on the grounds of national security?

No Yes

Do not write anything about this information on the form. Please provide full details on separate sheets, plus provide a copy of the application form to the Secretary of State for a Direction on the issue of National

C4 Data Protection

The information you give will be used by the Local Authority to process your application. It will be placed on the relevant public register and used to monitor compliance with the permit conditions. We may also use and or disclose any of the information you give us in order to:

- consult with the public, public bodies and other organisations,
- carry out statistical analysis, research and development on environmental issues,
- provide public register information to enquirers,
- investigate possible breaches of environmental law and take any resulting action,
- prevent breaches of environmental law,
- assess customer service satisfaction and improve our service.

We may pass on the information to agents/ representatives who we ask to do any of these things on our

It is an offence under Regulation 32 of the PPC regulations, for the purpose of obtaining a permit (for yourself or anyone else) to:

- make a false statement which you know to be false or misleading in a material particular,
- recklessly make a statement which is false or misleading in a material particular.

If you make a false statement

- we may prosecute you, and
- if you are convicted, you are liable to a fine or imprisonment (or both).

Euromix Concrete, Ipswich Site Layout

Doc No EEP/ips/010

Local Authority Pollution Prevention and Control

The Installation Document No. EEP/IP/003

B2.0 Introduction

The Installation

B2.1 Description

The proposed installation is as wet batch ready mix concrete plant.

Aggregates are by fed by loading shovel by supplier directly into overhead storage bins, which, when required is belt fed to the mixer. Movement of all coarse materials are within housed conditions and therefore do not present a dust hazard.

Cements are stored in two silos; both are fitted with DISA SiloSafe and SiloSafe 24-fans with reverse jet cleaning designed to filter displaced air from storage silos when they are being charged from road tankers, during charging an exhaust filter guarantees a dust free procedure.

High level alarms are fitted giving audible and visual signal that capacity is nearing completion and charging ceased, should there be continued charging an automatic shut off pinch valve will be activated preventing any potential dust emission.

Cements are transferred from the silos to mixer via enclosed mechanical screws preventing any potential dust emission.

All materials including water are fed into an enclosed forced mixer, thereafter the plastic concrete is discharged into a truckmixer.

B2.2 Atmospheric Emissions

- B2.2.1 Ground storage bays are walled to three sides. However, control of fugitive dust is covered by document Number EEP/IPS/005.
 - B2.2.2 In normal operation no visual emissions
 - B2.2.3 In event of malfunction potential emissions as follows
 - 2 powder sources A1 and A2 (EEP/IPS/003) in the event of filter failure.
 - B2.2.4 All conveyers and hoppers are enclosed, no foreseeable emissions.

Local Authority Pollution Prevention and Control

Reporting Unauthorised Releases

Document No. EEP/IP/004

1.0 Introduction

1.1 This procedure details the reporting of unauthorised releases as detailed in the LAPPC permit.

2.0 Responsibilities

Responsibility – All. Supervision – Plant Supervisor. Area – All.

- 3.1 Any occurrence, which is likely to cause an unauthorised release, should be immediately reported to the Plant Supervisor, Administration or Technical Department, who will then report this to the Local Council.
- 3.2 The local Council will be notified without delay of;
- 3.2.1 Any serious malfunctions or breakdown likely to lead to abnormal emissions being released that could affect the local community.
- 3.2.2The release of any substance that exceeds the guidelines defined in the authorisation.

Local Authority Pollution Prevention and Control

Control of fugitive dust

Document No. EEP/IP/005

1.0 Introduction

1.1 Procedure for controlling and reporting fugitive dust emissions.

2.0 Responsibilities

2.1 All

Ensuring that all dust emissions are controlled and contained within the site where Practicable. All incidents/occurrences leading to dust emissions must be recorded and defects reported on the maintenance report.

2.2 Maintenance, to ensure that timely corrective and preventative action is taken to ensure the control of dust emissions.

- Plant and buildings
- 3.1.1 Wherever practicable all plant doors must be closed to prevent dust emission escaping into the atmosphere.
- 3.1.2 Any occurrence leading to dust emissions from plant must be dealt with immediately, including turning off the source and investigate the problem where possible.
- 3.1.3 The source of the dust should be identified where possible.
- 3.1.4 All incidents must be recorded on the daily maintenance report.

Local Authority Pollution Prevention and Control

Housekeeping Document No. EEP/IP/006

1.0 Introduction

1.1 Procedures detailing the housekeeping of the Site, carry out regular audits

2.0 Responsibilities

2.1 Plant Supervisor

To ensure adequate housekeeping audits are maintain and regular checks are carried out.

To assign corrective actions.

2.2 Plant Staff to operate good housekeeping practices and report any hazards.

- 3.1 Good housekeeping practice ensures that potential hazards to health and environment are eliminated.
- 3.1.1 It is the responsibility of all employees to ensure that the working environment is kept as clean and tidy as possible.
 - 3.1.2 All employees should ensure that materials or equipment used is put away at the end of a job.
 - 3.1.3 Any spillage should be immediately cleared up.
 - 3.1.4 It is the responsibility of all employees to report to their plant supervisor of any hazard.
 - 3.2 Audits
 - 3.2.1 Regular housekeeping audits are to be carried in order to ensure a high standard housekeeping is achieved and maintained. Also to ensure that timely corrective action is carried out.
 - 3.2.2 Completed audits shall be stored at the plant.

Local Authority Pollution Prevention and Control

Reporting and Recording Complaints

Document No. EEP/IP/007

1.0 Introduction

1.1 Procedure for recording and reporting complaints received from external sources.

2.0 Responsibilities

Responsibility - All Supervision - Plant Supervisor Area - All

- 3.1 Complaints relating to the plants activities should be referred to the following personnel Normal Business Hours - Plant Supervisor 01473 225775.
 Should the above contact not be available the Head Office personnel can be contacted 01245 464545
- 3.2 The person receiving the complaint must note the complainants name, address, telephone number and nature of the complaint. They should also arrange for the complaint to be investigated.
- 3.3 All complaints should be investigated without delay. If necessary the complainant will be visited to discuss matters personally.
- 3.4 Details of all complaints and finding shall be recorded in the complaints log.
- 3.5 The Plant Supervisor will periodically review the complaints log for trends.

Local Authority Pollution Prevention and Control

Reporting Faulty Equipment

Document No. EEP/IP/008

1.0 Introduction

1.1 To report any faults in equipment that may give rise to reduced environmental performance/incidents are reported and repaired accordingly.

2.0 Responsibilities

Responsibility - All Supervision - Plant Supervisor Area - All

3.0 Procedural Detail

3.1 Any person identifying a fault in equipment that may give rise to a situation of:

Reduced environmental performance

May lead to a breach in emission limits

May lead to an environmental emergency/incident

must inform the plant supervisor as soon as is practicably possible.

- 3.2 The defect sheet is to be submitted to the Maintenance Department who will initiate repairs.
- 3.3 Where appropriate the fault will be reported to the Local Authority.

Local Authority Pollution Prevention and Control

Potential effect on local environment Document No. EEP/IP/009

1.0 Introduction

1.1 Local environment

2.0 Assessment on local environment

- 2.1 This is a new installation and therefore have no history of complaints.
- 2.2 No significant effects as situated in heavy industrial area.

3.0 Sites of special scientific Interest

3.1 None.

4.0 Significant effects on SSSI sites

4.1 No significant effect anticipated.

Local Authority Pollution Prevention and Control

Air Quality

Document No. EEP/IP/012

1.0 Introduction.

1.1 Procedure to ensure air quality in local vicinity is monitored for the control of dust.

2.0 Responsibilities

2.1 Plant Supervisor.

Supervision and to action any issues with air quality.

To ensure audits are carried out to monitor air quality. To report any dust emissions.

3.0 Procedural Detail

- 3.1.1 Air quality is assessed on visual audits, which are carried out by a nominated member of staff.
- 3.1.2 The audits are carried out in accordance with the guidelines as given by the local authority pollution prevention control (LAPPC) regulations.
- 3.1.3 The audits are carried out on two levels: Daily

Weekly

- 3.1.4 Daily audits are of a general observation of emissions by the nominated person or by report emissions from other employees.
- 3.1.5 Weekly audits are to a prescribed format as advised (see 3.1.2)
- 3.1.6 Completed visual audits will be filed at the site office.

3.2 Non Conformances

- 3.2.1 It is the responsibility of the emissions auditor to report any emissions to the management personnel.
- 3.2.2 The cause or the emissions will then be assessed and repaired as required.

3.3 External Air Quality Assessment

- 3.3.1 On occasions, as required, the use of an external contractor will be employed to assess air quality.
- 3.3.3 Reports will be sent to the Plant Supervisor.
