

## **Inspection Notes 03/12/12 Cement Batching Plant**

Inspection carried out by Louise Burns with Nigel Stephenson with reference to the recent guidance PG3/01(12).

Batching plant only used for a couple of hours a day as demand is low. Site in good clean condition.

### **Condition 1**

Visible emissions monitored and recorded daily.

### **Condition 2**

Documents associated with application state that silos are designed to emit less than 10mg/m<sup>3</sup>.

### **Condition 3**

New in house maintenance management system [MMS] in place to cover calibration and maintenance.

### **Condition 6**

High level and High High level alarms on all silos, alarm will sound and delivery automatically stops.

### **Condition 8**

Displaced air emits through the pressure relief filters [WAM].

### **Condition 10**

One conveyor, not currently covered – sand inherently damp so to date not necessary – **will ask Nigel to monitor**

### **Condition 11**

Waste stored in bay in large lumps, taken away by waste contractor

### **Condition 14**

Spray bars around discharge point

### **Condition 15**

Training records on site and available to view
