The New Pollution Prevention and Control Regime

A new system of regulation for dealing with pollution issues, known as Pollution Prevention Control (PPC), came into force in 2000. PPC is introduced by way of the Environmental Protection Act 1990, the current pollution framework under which you are authorised for Local Air Pollution Control.

The basic purpose of the PPC regime is to introduce a more integrated approach to controlling pollution from industrial sources. It aims to achieve "a high level of protection of the environment taken as a whole by, in particular, preventing, or where that is not practicable, reducing emission into the air, water and land" (*Regulation 8(2)-(3)*).

The PPC system applies an integrated environmental approach to the regulation of certain industrial activities. This means that emissions to air, water (including discharges to sewer) and land, plus a range of other environmental effects, must be considered together. It also means that permit conditions must be set so as to achieve a high level of protection for the environment as a whole. These conditions are based on the use of the "**Best Available Technique**" (BAT), which balances the costs to the operator against the benefits to the environment.

The PPC system places industrial and commercial installations into three new parallel regimes:-

- A1 Integrated Pollution Prevention and Control enforced by Environment Agency.
- A2 Integrated Pollution Prevention and Control (LA-IPPC) enforced by Local Authorities.
- B Local Air Pollution Prevention Control (LAPPC) enforced by Local Authorities.

Installations falling within the A1 and A2 regimes will be subject to control of pollution to land, air and water, together with noise and vibration, energy, land contamination, emergencies, amongst other things. Part B processes currently authorised under Part 1 of the Environmental Protection Act 1990, like your authorised process, will transfer to the LAPPC regime and I remain subject to air pollution control only.

New installations falling under the LA-IPPC or LAPPC regimes should contact the Local Authority for an application pack. You will be given advice on how to prepare your application and how the regime will apply.

For existing authorised processes, the changeover from LAP to LAPPC will essentially be an administrative one and will not involve payment of new application fees. The transfer will take place over a phased timetable. An extract of Defra guidance setting out the transfer timetable is attached.

Installations transferring from LAP to LAPPC do not have to take action at this stage. You are considered to have made a deemed application. The Local Authority has 12 months to transfer your LAP authorisation to an LAPPC permit. If your authorised process is due for transfer, you will be contacted to confirm that a deemed application has been made. If the Local Authority fails to notify you of its determination of the application within 12 months the operator can notify the Local Authority in writing which then triggers a deemed refusal. The operator will then have leave to appeal against this refusal.

For further information, contact Environmental Protection Services on 01473 433115.

Application for a permit

Local Authority Pollution Prevention and Control

Pollution Prevention and Control Act, 1999

Pollution Prevention and Control (England and Wales) Regulations 2000 (as amended)

Introduction

When to use this form

This regime is known as Local Authority Pollution Prevention and Control, LAPPC. Installations permitted under this regime are known as B installations. Use this form if you are sending an application for a 'Part B' permit to a Local Authority under the Pollution Prevention and Control (England and Wales) Regulations 2000 (as amended) ("the PPC Regulations").

Before you start to fill in this form

Please read the Defra general guidance manual issued for LA-IPPC and LAPPC. This contains a list of other documents you may need to refer to when you are preparing your application, and explains some of the technical terms used. You will also need to read the relevant sector guidance note, BREF note or Process Guidance note as relevant. The Pollution Prevention and Control (England and Wales) Regulations 2000 can be obtained from The Stationary Office, or viewed on their website at: www.legislation.hmso.gov.uk/si/si2000/20001973.htm

Which parts of the form to fill in

You should fill in as much of this form as possible. The appropriate fee must be enclosed with the application to enable it to be processed further. When complete return to:

*Environmental Protection Services
Ipswich Borough Council
Civic Centre
Civic Drive
IPSWICH
IP1 2EE*

Other documents you may need to submit

There are number of other documents you may need to send us with your application. Each time a request for a document is made in the application form you will need to record a document reference number for the document or documents that you are submitting in the space provided on the form for this purpose. Please also mark the document(s) clearly with this reference number and the application reference number, if you have been given one, which will be at the top of the form overleaf. If you do not have either of these, please use the name of the installation.

Using continuation sheets

In the case of the questions on the application form itself, please use a continuation sheet if you need extra space; but please indicate clearly on the form that you have done so by stating a document reference number for that continuation sheet. Please also mark the continuation sheet itself clearly with the information referred to above.

Copies

Please send the **original and 3 copies of the form** and all other supporting material, to assist consultation.

If you need help and advice

We have made the application form as straightforward as possible, but please get in touch with us at the local authority address given above if you need any advice on how to set out the information we need.

LAPPC Application Form: to be completed by the operator		
For Local Authority use		
Installation Reference:	Officer Reference:	Date received:

B1.2 Why is the application being made?

- the installation is new
- it is an existing Part B process authorised under the Environmental Protection Act for which a substantial change is proposed within 4 months of the transitional date and an LAPPC permit is required.

B.1.3 Site Maps

Please provide:-

- A suitable map showing the location of the installation clearly defining extent of the installations in red

Doc Reference 779.3

- A suitable plan showing the layout of activities on the site, including bulk storage of materials, waste storage areas and any external emission points to atmosphere

Doc Reference MGN/LP/NW 02.

B2 The Installation

Please provide written information about the aspects of your installation listed below. We need this information to determine whether you will operate the installation in a way in which all the environmental requirements of the PPC Regulations are met.

B2.1 Describe the proposed installation and activities and identify the foreseeable emissions to air from each stage of the process (this will include any foreseeable emissions during start up, shut down and any breakdown/abnormal operation)

The use of process flow diagrams may aid to simplify the operations

Doc Reference: 4390

B2.2 Once all foreseeable emissions have been identified in the proposed installation activities, each emission should be characterised (including odour) and quantified.

- **atmospheric emissions** should be categorised under the following
 - (i) point source, (e.g. chimney / vent, identified by a number and detailed on a plan)
 - (ii) fugitive source (e.g. from stockpiles / storage areas).

If any monitoring has been undertaken please provide the details of emission concentrations and quantify in terms of mass emissions. If no monitoring has been undertaken please state this.

(Mass Emission - the quantification of an emission in terms of its physical mass per period of time. Eg. Grams per hour, tonnes per year)

LAPPC Application Form: to be completed by the operator		
For Local Authority use		
Installation Reference:	Officer Reference:	Date received:

B2.3 For each emission identified from the installations' activities describe the current and proposed technology and other techniques for preventing or, where that is not practicable reducing the emissions. If no techniques are currently used and the emission goes directly to the environment, without abatement or treatment this should be stated

Doc Reference: DC91120/A + SCG/SH/MID16004

B2.4 Describe the proposed systems to be used in the event of unintentional releases and their consequences. This must identify, assess and minimise the environmental risks and hazards, provide a risk based assessment of any likely unintentional releases, including the use of historical evidence. If no assessments have been carried out please state.

Doc Reference: No - Unlikely

B2.5 Describe the proposed measures for monitoring all identified emissions including any environmental monitoring, and the frequency, measurement methodology and evaluation procedure proposed. (e.g. particulate matter emissions, odour etc). Include the details of any monitoring which has been carried out which has not been requested in any other part of this application. If no monitoring is proposed for an emission please state the reason.

Doc Reference: 4390

B2.6 Provide detailed procedures and policies of your proposed environmental management techniques, in relation to the installation activities described.

Doc Reference: _____

B3 Impact on the Environment

B3.1 Provide an assessment of the potential significant local environmental effects of the foreseeable emissions (for example, is there a history of complaints, is the installation in an air quality management area?)

Doc Reference: MGN/LP/VN 001

B3.2 Are there any sites of special scientific interest (SSSIs) or European Sites which are within 2 kilometres of the installation?

No

Yes please give names of the sites

Not Known.
