

Hi Mike,

At our meeting last week, I mentioned that I would catch up with you to find out where we are with things regarding the crem:

- Annual testing results - received. I have checked them and they appear to be compliant to the requirements of the permit.
- Continuous monitoring – from the email below, I gather that cremations in cremator 3 are now being logged continuously. It is unclear whether cremator 2 is also being continuously monitored with success? I understand that cremator 1 is now permanently off line.
- Service records - received.
- Alarms – I understand that Combustion Solutions have taken PCME on as subcontractors and that they are in the process of resolving this issue. Can you advise when this is due to be completed?
- Clarification of PCME monitor – Andrew B will be providing clarification on this.

Thank you for your assistance.

Regards,  
Varuna

Mike

With regard to our email from yesterday we can confirm that after a discussion with site today (24 June) the five cremations that were cremated in Cremator 3 on the 23 June 2011 have all successfully been logged and reported.

If you require any further assistance please do not hesitate in contacting us.

Kind Regards

Andrew S Hamer
